

BEANS

- We grow several varieties of beans and they are divided into several categories:
- Broad Beans: Aquadulce Claudia is the hardier variety, and Masterpiece is available later in the season, giving you a longer cropping period for these fantastic beans.

- Climbing French Beans: Blue Lake is the standard long green pod and Borlotti Firetongue is a renowned Italian variety, great for use as French beans, shelling and using in soups, or for drying for use later in the season.

- Dwarf French Beans: The variety we grow is Sprite. The beans grow around 6 inches long and are held above the foliage, making it easy to pick them, and keeping them clear of soil splashing up in the rain.

- Runner Beans: We grow White Lady, a well-known AGM variety. These white flowered beans are less prone to bird attack than red flowered varieties, and they also set well whatever the weather. We also offer 'Hestia', a dwarf variety suitable for growing in a pot or in windy locations.
