

# CHILLI FOCUS

Chilli Focus is the premier liquid nutrient for chillies and peppers. It is based on commercial chilli nutrients, and has been manufactured by Growth Technology for over 20 years.

Chillies and peppers have specific nutritional requirements, and whilst reasonable growth and performance can be gained with general purpose feeds, the best results will only be achieved by using a formulation specifically designed. Chilli Focus is precisely formulated for the needs of chillies and peppers. It supports the production of healthier, more vigorous plants and colourful, juicier fruits.

We had previously used Miracle-Gro on our chillies and peppers during the early season when the plants were putting on leafy growth, and then switched to tomato food once the fruit began forming. In 2017 we switched over and began using Chilli Focus, having heard so many good things about it, and the results were astounding, so much so that we had real problems transporting much larger plants than we'd ever grown before.

We are an authorized stockist for Chilli Focus, as it is not available in High Street shops, large garden centres or DIY outlets. It comes in with full instructions on each pack, and can be used at all stages of plant growth, so no need to switch from one product to another.

Pack size	Price
300ml	£5
1 ltr	£10
5 ltr	£25
<b>**special offer** 300ml Chilli Focus &amp; 500ml RTU SBPI</b>	<b>£10</b>
