

OLIVE TREES

The olive trees we offer are fully hardy and can be grown outdoors (they are also evergreen), even though most people consider them to only be a Mediterranean tree. If you grow them under glass then you may get a small harvest, but it is a lengthy process to get them to the edible stage, so a challenge for only the most ardent gardener.

We have olive trees in various sizes, usually heavily covered in flowers or even baby olives as the season progresses. While olive trees are widely available, ours are grown on much longer before sale, giving them a much thicker trunk and a bushier, more developed head. We sell them in matched pairs, allowing you to really make the most of their stunning appearance.

We generally only bring the olive trees to our bigger events due to pitch sizes and the sheer space they take up, so if you're not able to make it to one of these events, the trees can be collected directly from us in Gosport, just ask for more information.
