

# 2025 Events

Our season begins in March, and runs until the autumn. Up until mid June we have a full range of veg, herb and fruit plants available, alongside our beautiful tropical and exotic plants. We will always bring the widest possible range to each event, but contact us **at least 3 days before the event** if you want to be sure we will have the particular plant you are after.

For the second half of our season we switch from our full range of veg plants to focus on the Chilli Festivals, along with other Garden Shows and Food Festivals. We grow over 150 varieties of chillies and peppers, many of them very unusual, and the plants at these events will be big, anything up to 3ft tall and smothered in chillies, as well as trailing varieties growing in hanging baskets with chillies cascading over the sides. Our tropical and exotic plant range will be even greater in the summer months. Alongside this will be a wide range of herbs and fresh produce, which allows you to try many of our fantastic tomatoes and chillies that are available as small plants in the springtime.
